a first process within the affiliate Web server to collect a user identification from

[a] the computer accessing [a] the Web site controlled by the affiliate Web server

and for sending the collected user identification and a request for content to the merchant Web server along with a request for content;

a second process within the merchant Web server for retrieving user information

from the database corresponding to the collected user identification;  
a third process within the merchant Web server for servicing the request for content by applying user information obtained from the database to the plurality of roles and for returning an address of selected advertising in response to the request for content, the advertising being selected based upon a result of applying the user information to the plurality of rules, and  
a fourth process within the computer accessing the Web site to fetch the selected advertising from the returned address and to cause the fetched advertising to be integrated into the Web site controlled by the affiliate server.

***Allowable Subject Matter***
